Website: hansel-suarez-personal-website.com

Systems engineer with a diploma in software engineering, specializing in the optimization and delivery of high-impact technological solutions. Proven experience in: Agile methodologies (Scrum) for efficient project management and rapid development cycles. Transformation of complex requirements into robust and scalable software designs. Collaboration in cross-functional teams, providing technical leadership to overcome integration challenges. My objective: To contribute my technical vision and adaptability to drive innovation and success in a dynamic environment.

Skills

I already know

Angular 5/5	TypeScript 4/5	SASS 4/5	PrimeNG 5/5	Tailwind CSS 3/5
Prettier 5/5	ESLint 4/5	NestJS 3/5	PostgreSQL 2/5	MongoDB 2/5
Firebase 4/5	pnpm 3/5	Karma 4/5	Jasmine 4/5	Jest 4/5	Docker 3/5
SonarQube 3/5	React.js 3/5	Storybook 2/5	Ionic 4/5	

I want to learn

Flutter   React Native   Supabase   Cypress   Svelte

I speak

Spanish native   English B1

Work experience

Technical Coordinator
Consultec-TI

`March 2023 - now`

- Proven Technical Leadership in directing multidisciplinary teams and managing the full development lifecycle of Front-End solutions.
- Led the successful implementation and migration of the core business platform, resolving complex architectural challenges and achieving substantial improvement in overall system

stability.

- Drove the adoption of mandatory Unit Testing and robust Code Review processes, which drastically eliminated the incidence of critical production bugs.
- Served as the primary technical coordination point for the team, translating complex business requirements into clear tasks and maintaining fluid communication with all stakeholders.

Technologies: Angular, PrimeNG, TypeScript, Nx, Storybook, NgRx

Software Development Consultant

April 2021 - now

Consultec-TI

- Responsible for the design and architecture of Front-End solutions, ensuring the long-term scalability, performance, and maintainability of the final product.
- Conducted technological trend evaluation, recommending and implementing cutting-edge frameworks and tools that optimized client development efficiency.
- Executed the development and coding of critical components, serving as the technical reference point to ensure adherence to code quality standards.
- Implemented agile and transparent project management, ensuring continuous quality control and on-time delivery of client-agreed deliverables.
- Provided expert consultation throughout the project lifecycle, assisting clients in resolving impediments and optimizing their internal development processes.

Technologies: Angular, PrimeNG, TypeScript, Nx, Storybook

Frontend Team Lead

January 2021 - March 2021

Mensajeros Urbanos

- Led the Front-End team in the complete development of the Unified Services Platform, ensuring cohesion and the delivery of key functionalities within a multidisciplinary environment.
- Responsible for the detailed analysis and design of Front-End tasks, including the creation of diagrams (class, flow, sequence) to align architecture with business objectives.
- Ensured visual consistency and development efficiency through the advanced utilization of the PrimeNG component library.
- Established and implemented code review processes and ensured the adoption of Angular development best practices, significantly raising the overall quality of the codebase.
- Applied the Agile methodology (Scrum) to manage the team's workflow, ensuring delivery predictability and effective communication of Front-End progress to stakeholders.

Technologies: Angular, Tailwind CSS, TypeScript, Freshchat

Technical Consultant
GBM Corporation

- Acted as a Specialized Technical Consultant for Banco BHD in the Dominican Republic, ensuring software solutions aligned with rigorous banking and financial sector standards.
- Directly responsible for the development and implementation of banking software products (both enterprise and personal) for Dominican Republic banking, with a focus on security and high-scale performance.
- Contributed to the architectural design of key components to ensure the scalability and high availability required by a major financial institution.
- Implemented coding best practices and efficient workflows to enhance the maintainability of software products.

Technologies: Angular, Bootstrap, TypeScript, ESLint, Firebase, pnpm

- -

Software Development Engineer
PRAGMA

June 2016 - December 2020

- Responsible for the full development of robust and dynamic web applications using Angular as the main framework, ensuring a fluid and reactive user experience.
- Deep experience in coding user interfaces with HTML5 and CSS3, with advanced proficiency in CSS Frameworks and preprocessors like SASS to ensure a modular and maintainable design.
- Mastery of the modern development ecosystem, including Node.js, bower, and npm for dependency management and server-side development where required.
- Implemented and managed automation tools such as Grunt and Gulp to optimize development workflows, which drastically reduced compilation time and improved team efficiency.

Technologies: Angular, Bootstrap, TypeScript, ESLint, Firebase, pnpm

- -

Software Development Engineer
Stack Pointer

May 2015 - May 2016

- Key contribution to the development of dynamic Front-End applications using AngularJS, ensuring user interface functionality and usability.
- Implemented modern and fully responsive user interfaces, leveraging frameworks like Bootstrap to ensure optimal viewing across all devices.
- Efficiently managed dependencies and critical project packages using tools such as Npm and Bower.
- Utilized Grunt for the automation of repetitive development tasks and processes, which improved efficiency in the compilation and deployment of Front-End code.

- Hands-on experience manipulating and querying data in critical environments, including SQL Server and Oracle databases. This expertise ensured effective integration between the Front-End and backend systems.

Technologies: Angular, Bootstrap, TypeScript, PostgreSQL

Education

Information Technology
October 2014 - July 2016

Wrocław University of Science and Technology

Master degree. Specialization in software development.

Information Technology
October 2011 - July 2014

Wrocław University of Science and Technology

Bachelor's degree. Specialization in application development.
